APEX
APPLIED PROGRAMMING EXPERIENCES

2023 SUMMER WORKSHOP

APEX aims to expose diverse students to programming by embedding Python-based computing modules into existing introductory statistics and biology courses

Statistics and biology faculty from Bay Area community colleges and San Jose State University are invited to attend a series of workshops designed to support faculty in adopting APEX materials

Introduction to Python Workshop (optional)

- Wednesday, August 9th, 9am-4pm, at SJSU Dept of Engineering
- For faculty new to programming or those needing a refresher...
- Learn the basics of Python and Google Colab via hands-on activities

APEX Summer Workshop

- Thursday, August 10th, 9am-4pm, at SJSU Dept of Engineering
- Try out APEX statistics and biology modules
- Learn best practices for adopting APEX modules and explore faculty development resources
- Build community among faculty, academic counselors, and industry representatives
